## **DETAILED ACTION**

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:
  - Prior art of record fails to teach independent claim 1 limitation of DTD having a plurality of element declarations, which respectively define a plurality of types of logical structures for said one document instance. This limitation is independent claims 9, 13 and 14.
  - Applicant's argument in the Appeal Brief filed on 6/17/2004, page 7, paragraph one is persuasive and reasonable.
  - Sato et al. (US Patent 6,014,680) hereinafter Sato teaches a method and apparatus for generating a structured document matching the document structure of each non-structured document by using a rule directly generated from a preset document structure definition for the conversion of the non-structured document into a structured document. Whereas Wanderski et al. (US Patent 6,519,617) hereinafter Wanderski teaches a method for translating an input document into a XML dialect such that automated, dynamically selected transformations can be applied to the document.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
